**PROTECTING  
HISTORY**

Paint runs through our veins.

**ADLER Histo**

**Casement windows and coupled windows**

*The architecture of our towns and villages just wouldn't be the same without historical buildings. Office buildings and residential buildings that originate from earlier centuries shape the style of many European towns and cities and, in rural areas too, historical residences and buildings provide some great architectural highlights.*

To preserve these buildings for the future and to ensure that they remain usable, they need to be regularly renovated and upgraded. This applies in particular to casement windows and coupled windows which give many buildings dating from previous centuries their special character.

In many cases, however, the best solution is to replace the outdated windows with newly manufactured versions in the original style. The authentic

look of the facade is retained and the newly manufactured windows guarantee the best possible comfort and durability, and a long lifespan – absolutely in line with today's requirements for sustainability. Sometimes, however, renovation of the old casement or coupled windows is preferred or called for.

ADLER has the perfect products and coating systems for both scenarios, and for either brush or spray application.

## RECONSTRUCTION / NEW PRODUCTION

The ADLER coating system for new casement windows and coupled windows provides an innovative, sustainable solution for historical buildings. The coating system is perfectly matched to the requirements of a more traditional style of building and to the conditions found in old masonry.

The ADLER coating system thus provides a long-lasting and highly durable surface for new casement and coupled windows, with a high degree of elasticity, excellent weather resistance and outstanding protection against water, and gives casement and coupled windows an authentic, historical look and a pleasant feel – allowing many more chapters of history to unfold on in the years to come.

The coating system is particularly efficient in use due to its optimal flow properties and the fact that it dries so quickly.

### Examples of coating:

#### Opaque coating system

- Aquawood Primo A2 White
- Aquawood Intercare ISO or Aquawood Intercare SQ
- Aquawood Covatop XT 20 or Aquawood Covapro 20 | 40 | 60

#### Transparent coating system

- Aquawood Primo A3-A6
- Aquawood Intermedio bzw. Aquawood Intermedio ISO
- Aquawood Finatop 40 bzw. Aquawood Finapro 20 | 40

## REPAIR AND RESTORATION

with the ADLER Histo system

Professional upgrading with the ADLER Histo coating system gives casement and coupled windows a fresh new look whilst retaining full functionality. Repair and restoration is usually the preferred option for the owners of buildings and for listed buildings, as the window will hardly be changed and there is no impairment to quality of life. Professional upgrading with ADLER Histo can be done by carpenters, window makers, painters, or companies that specialise in this field.

Whether they work on site or in a spraying booth – either is possible with the ADLER Histo system. Because ADLER Histo-Base and ADLER Histo-Protect can be used both on site with brush application and in a spray booth using spraying equipment. It is often the case that the specialists carrying out the work will need to take the window components apart, whilst the window frame remains in place. With ADLER Histo, application is very flexible and efficient, regardless of the location where the work is being carried out.

### Coating system for repair work

- 1 x ADLER Histo-Base
- 2 x ADLER Histo-Protect

And there are no limits when it comes to design. ADLER Histo offers an unlimited diversity of shades and can be tinted to achieve any colour from the colour-mixing system Color4You or from ADLER's on-trend Alpine Selection.

## ADLER HISTO-SYSTEM

### Product information

#### ADLER HISTO-BASE

ADLER Histo-Base is a **primer** that was developed especially for the renovation of casement and coupled windows and that will keep the moisture regulation of your surface firmly under control. It has been perfectly tailored to the conditions found in historical masonry. Furthermore, this primer performs very well with excellent weathering resistance in exterior areas and outstanding adhesion on metallic components such as window fittings and handles. As a primer, ADLER Histo-Base therefore offers the best prerequisites for the process of repairing and restoring casement and coupled windows.

**Product no.**  
5497 050000

**Container**  
2,5 l | 20 l

#### ADLER HISTO-PROTECT

Final **protection** for many years to come with ADLER Histo-Protect as part of the overall coating system. The user-friendliness of this product and its flexibility in terms of being suitable for either **brush or spray** application means that window components that cannot be removed can be coated directly on site. You will be impressed by this silk matt and opaque finishing coat, made from linseed oil, which provides outstanding weathering resistance and a high degree of elasticity. ADLER Histo-Protect has excellent properties of adhesion, dries quickly and is flexible and efficient in use. This finishing coat is vapour permeable and regulates moisture.

#### ADLER PRODUCT RECOMMENDATION

We have the perfect product for the removal of old coats of paint or varnish – **ADLER Abbeizer-Spray**. You can find more information on this product in our Professional Equipment Catalogue (Profi-Zubehör-Katalog) (product no. 9887101).

Paint runs through our veins.

Over 85 years ago, Johann Berghofer laid the foundations for ADLER and started to develop his own paints and varnishes. Much has changed since that time, but one thing has remained the same: our passion for paint, which drives us day after day to work on the perfect surface coating.
