FOR WINDOWS  
VERY CLOSE TO NATURE

# AQUAWOOD NATIVA

For windows very close to nature.

A natural look and feel like never before offers the new Aquawood Nativa topcoat for wood-aluminium components. Lovers of natural wood look will be impressed! Although the surface looks unpainted and feels like untreated wood, it is resistant to light and chemicals. The coating also impresses with good scratch resistance, high block resistance and unadulterated transparency. An unprecedented brilliance on dark wood species paired with a very low, matt gloss make Aquawood Nativa the perfect choice for wood lovers and purists.

## YOUR BENEFITS

- // Original wood look
- // Warm haptics
- // Perfect, unadulterated transparency
- // Dull matt gloss level
- // Very good glossy properties
- // Standard-compliant on wood-aluminium constructions

## APPLICATION AREAS

- // For dimensionally stable wood-aluminium components, such as windows and front doors
